## SUMMARY

With over 3 years of professional web development experience, I possess strong communication skills, organizational prowess, and a collaborative spirit. My approach is characterized by clarity, directness, and a knack for fostering positive working relationships. Alongside my technical expertise, I also harbor a penchant for the artistic aspects of design.

## SKILLS

- Java
- SQL
- JavaScript
- HTML, CSS, SCSS
- React
- TypeScript
- Backbone
- jQuery
- Git

## WORK EXPERIENCE

### Software Developer October 2021 - Present | B&H Photo Video

Started at B&H as a front-end developer working on bug fixes, enhancements, and feature building. Achievements during this time include:

- Building AB tests to test banners for effectiveness (*React, Javascript, Typescript*)
- Revamping the process of submitting W9 when applying to B&H's B2B domain (*Weblogic, JQuery, CSS*)
- Rebuilding the user's navigation bar as part of a more extensive code migration (*HTML, SCSS, Javascript, Weblogic*)

When our back-end team experienced staffing constraints, I volunteered to undergo training as a back-end developer.

Subsequently, I transitioned into the role, addressing tickets spanning the entire stack such as:

- Solving software issues that blocked users from viewing their savings (*Javascript, Java*)
- Building many data integration solutions to transmit updated information from the data source to the front-end interface (*Java, Typescript*)

### Software Developer March 2020 – May 2021 | Overpass

Initially joined the organization as an intern and subsequently transitioned into a full-time employee role. My achievements during this time included:

- Implemented filtering options to enhance the clarity and ease of navigation when accessing their employee information (*Couchbase*)
- Redesigned the website's chat box to enhance its visibility and usability for customers (*HTML, SASS, Javascript*)
- Crafted effective error messages for failed user login or account creation process (*Javascript, Aurelia*)

### Administrative Assistant September 2017 – July 2019 | Chabad Jewish Academy

Managed a complex, bilingual, and fast-paced environment. My responsibilities included:

- Facilitating effective communication between administration and staff members, as well as between administration and parents
- Ensuring accurate record-keeping and timely submission of reports to government agencies
- Managing an after-school enrichment program
- Providing one-on-one care for students as needed

Skills included working with Excel, Salesforce, Canva design, and Accounts Receivable.

## PROJECTS & ACHIEVEMENTS

### CJA Website - Jan 2024 - Present - [chabadjewishacademy.org](http://chabadjewishacademy.org)

I created a robust website for the Chabad Jewish Academy using Wix.com. Key features include an interactive calendar, virtualized application, registration portal, and secure payment system. Positive feedback from faculty and parents underscores its user-friendly design and comprehensive functionality. Phase two is currently in development.:

### Elevation - 2019-2020 - [github.com/Rachel-Aizenman/p2p](https://github.com/Rachel-Aizenman/p2p) 2019-2020

Completed an intensive full-stack web development program

Built projects using HTML, CSS, JavaScript, Node.js, React, MongoDB, and SQL.

Completed several projects, including a peer-to-peer lending listed above.
